Sharad Sonkar

UX/UI Lead | Product Designer | Design Systems & Accessibility

sharadsonkarofficial@gmail.com | +91 9039990922 | Pune, India | linkedin.com/in/sharadsonkar

SUMMARY

UX/UI Lead and Product Designer with 10+ years of experience designing enterprise products, design systems, and conversational AI for web and mobile. Built a token-based enterprise design system that cut developer handoff time by 35%. Skilled in user research, personas, journey mapping, prototyping, and usability testing, with a strong focus on WCAG 2.2 accessibility and user-centered design. Experienced in leading cross-functional Agile teams from discovery through delivery. Creator of an open-source AI product design team for Claude that runs an MVP-first, accessibility-first design workflow with 14 specialist agents and human approval checkpoints.

WORK EXPERIENCE

UX/UI Lead (Specialist) | Amdocs

02/2023 - Present | Pune, India

- Led the creation of the enterprise design system, with reusable components, design tokens, and usage documentation, reducing developer handoff time by approximately 35%.
- Defined end-to-end UX strategy for internal productivity platforms, simplifying multi-step workflows for 20000+ users across departments.
- Designed AI Toolbox, an enterprise-wide platform for discovering and using AI tools from one place, including its mascot and visual identity.
- Designed ProcQ, a procurement bot that answers queries without users switching between internal systems.
- Designed the AI Marketplace, a central catalogue for discovering and installing AI skills and MCP connectors. Owned UX for
- Ping, the enterprise conversational AI assistant on web and mobile, covering Q&A, support ticket submission, and handoff to live agents.
- Restructured information architecture for internal documentation platforms, reducing related support tickets by 28%.
- Designed data-heavy enterprise dashboards, using visual hierarchy to help users interpret and act on data faster.
- Ran usability testing in every design cycle and iterated designs based on user behaviour.
- Drove WCAG 2.1/2.2 compliance across the product line, covering colour contrast, keyboard navigation, and screen reader support. Partnered with engineers during developer handoff and QA to ensure shipped products matched design intent.

- IT Application Consultant (UX/UI) | Fusion Software Solutions

06/2022 - 02/2023 | Pune, India

- Redesigned responsive web and mobile applications for 120 enterprise clients, realigning product flows with user expectations. Facilitated stakeholder workshops to define product direction and consolidate requirements across cross-functional teams.
- Created user flows, wireframes, and interactive prototypes to validate solutions before development. Designed conversational interfaces that simplified complex multi-step interactions.

- Senior UI Engineer | Hiecor Software Solutions
- 11/2020 - 06/2022 | Indore, India
- Led the UI redesign of a CRM platform across web and mobile, improving usability and visual consistency. Built a scalable UI
- architecture and shared component library with the development team using modern front-end frameworks. Improved front-end performance and code quality by consolidating repeated design patterns into reusable components.
- Conducted usability testing sessions and refined designs based on findings.

- Senior UX/UI Designer | Ignis IT Solutions Pvt. Ltd.

08/2018 - 11/2020 | Indore, India

- Managed the full UX lifecycle for enterprise applications in the legal and education sectors, from research to deployment. Conducted user research, created personas and journey maps, and built interactive prototypes to validate concepts before
- engineering investment. Led design reviews with stakeholders to finalize solutions aligned with business requirements and constraints.
- Mentored 4 junior designers through regular design critiques and feedback on decision-making.

- Web Designer | EngineerBabu

07/2016 - 07/2018 | Indore, India

- Designed responsive web applications for 15+ clients across fintech, real estate, and eCommerce.
- Delivered interfaces with a consistent focus on usability and performance.
- Contributed to large-scale, client-facing digital products from concept to delivery.

PROJECTS

AI Product Design Team for Claude (Open-Source Plugin) | Creator
09/2026 - Present | https://github.com/sharadsonkarwork/AI-Product-Design-Team-for-Claude

- Created a Claude plugin that runs an end-to-end product design workflow with 14 specialist AI agents, covering research, strategy, MVP scoping, UX, design systems, content, prototyping, critique, validation, developer handoff, measurement, and build QA.
- Designed the workflow around four phases with human approval checkpoints, a quality gate for every stage, and fix loops, with WCAG 2.2 AA, Nielsen's heuristics, and the Laws of UX built into each step.
- Scoped MVPs with MoSCoW combined with value vs effort, testable hypotheses, and go / no-go criteria, so detailed design starts only after a cheap concept is validated.
- Shipped v1.2.0 with Lite, Standard, and Full run modes, lower token use through stage summaries and chunked heavy stages, resume after interruption, and a portfolio case-study agent.

SehatSafe: Family Health Vault (Mobile, India) | Product Design Lead, using the plugin
09/2026 - 10/2026 | Android and iOS, English and Hindi

- Took a health-records app from PRD to developer handoff: desk research and analysis of 6 competitors, 251 traceable requirements, and an MVP of 18 of 34 features with hypotheses and go / no-go criteria.
- Designed 71 mobile screens with every state at three breakpoints, for family managers, seniors with low vision or tremor, and Hindi-first users on low-end phones.
- Built a token-based design system from scratch: 768 tokens, light and dark themes, and 46 components, with all 756 colour pairs passing WCAG 2.2 AA contrast.
- Built clickable concept and high-fidelity HTML prototypes in English and Hindi; resolved every Critical and High issue across two validation rounds, with 0 automated accessibility violations across 56 screens.
- Applied privacy by design for health data under India's DPDP Act, including consent flows for family members and user data rights, and delivered a developer handoff and beta measurement plan.

EDUCATION

Bachelor of Engineering, Electronics & Communication | Medi-Caps Institute of Science & Technology 07/2012 - 06/2016 | Indore, India

---

SKILLS

UX Research & Strategy: User Research, Personas, Journey Mapping, Information Architecture, Usability Testing, Heuristic Evaluation, A/B Testing, Product Thinking
UX/UI & Product Design: Interaction Design, Wireframing, High-Fidelity Prototyping, Responsive Design, Mobile Design, Visual Design, Motion & Micro-interactions, Dashboard UX, Conversational AI / Chatbot UX
Design Systems: Design Systems Architecture, Design Tokens, Component Libraries, Interaction States, Documentation, Design Governance
Accessibility: WCAG 2.1/2.2 Compliance, Semantic HTML, Keyboard Navigation, Screen Reader Support, Inclusive Design
AI-Assisted Design: Claude Code Plugins, Multi-Agent Workflow Design, Prompt Engineering, AI Agents and Skills, MVP Scoping, Privacy by Design
Front-end: HTML5, CSS3/SCSS, JavaScript, React (working knowledge), Git, Developer Handoff, Design-to-Code Alignment
Tools: Figma, FigJam, Miro, Jira, Adobe CC, Claude
Leadership: Team Mentoring, Stakeholder Management, Cross-Functional Collaboration, Agile/Scrum, Workflow Optimization
